PROJECTS

Threat Hunting Analysis Using Cowrie Honeypot and Splunk

- Simulated SSH/Telnet server with a cowrie honeypot.
- Calculated the time from honeypot deployment to first attacker connection/login
- Conducted data exploration and visualization of collected data (3 days running honeypot) in Splunk.
- Visualized the Origin of Attacks, Top 10 Usernames/Passwords Used, Top Commands, Total Events, and Time Analysis of events.

CERTIFICATIONS

- CompTIA Security+
